

Our Mission Statement

SCOPE is committed to improving the lives of exceptional students in our community.

We provide a support network for parents and educators, serve as a community resource for information about special education services, provide enrichment opportunities to exceptional students and their teachers, and maintain an active voice in pertinent legislative issues.

Who Should be Involved?

- ☛ Parents and/or guardians of children from birth to age 21 who receive special education services – in or out of the community.
- ☛ Parents who are just learning about the special education process and IEPs (Individualized Education Plans) or who already have children on an IEP.
- ☛ Parents, educators and professionals who want to learn more about local resources – therapists, testing, workshops, programs, camps, etc.
- ☛ Parents who would like a support group that understands their issues and concerns.

Why Should I Get Involved?

- ☛ To have input into programs that could affect your child.
- ☛ Networking with parents “who have been there” – sharing tips, advice and feedback or what has and has not worked for them.
- ☛ To learn to advocate more effectively for your child and learn to maneuver in the special education maze.

When are the meetings?

SCOPE hosts parent meetings, workshops and social activities regularly throughout the school year. Notices of our events are distributed in the school system and on our website at www.scopesnetwork.org.

For more information, call Beryl Williams at 977-4465.
